TEST 1

8:00 p.m. - 9:15 p.m., Thur., Sep. 28

Todd 130

- Closed book and notes.
- Covers Chapter 1 through 4.
- Bring one 8½ × 11" summary sheet (double-sided) printed or written in ink reflecting your preparation for the test: Only formulae, definitions, theorems, and properties are allowed; NO specific numerical examples including H.W. problems and sample test problems with their solutions are allowed. If these are violated, you forfeit the course grade and further disciplinary action may be taken. I will check your summary sheets during the exam.
- Bring your own calculator. You are not allowed to share a calculator. (No calculator on a smart phone is allowed.)
- The (sample) test given in Spring, 2016 can be downloaded from my Web page.
- The sample test is to provide an idea about important topics you should know. The actual test may not be similar to the sample test. The problems on the test may be similar to H.W. as well as examples discussed in class.
- The TA will go over the sample test during th lab. Please do the sample test as much as possible before your lab.
- There will be class on Thursday, Sep. 28.
